Dont Just Take It From Us...Read What CPAPMax Pillow 2.0 Users Have to Say

A recent survey shows that a CPAPMax 2.0 Pillow dramatically improves sleep for CPAP Mask Users. Here's what traditional and nasal mask users say:

93% Cited improved comfort.

Experienced reduced mask shifting throughout the night. **87%**

88% Slept better during the night.

Improved breathing and alignment. **83%**

"If you have sleep apnea, you need this pillow! WOW, what a difference. No mask slippage and I can sleep on my side too! What a great addition to my treatment."

- Scott E., Wisconsin

"I was having a very hard time sleeping while wearing my CPAP. I saw your pillow when I was ordering another product and purchased one. Wow! Now I sleep comfortably without pressure on my face or leaks!"

- Joseph A., New Jersey

"It gives my head and neck great support. I can turn to the right or left with the CPAP mask on without any problems. It's just what I needed."

- Dot; Columbus, Georgia

"Great Pillow! Supports the neck and cradles the head, whether you sleep on your back or side. And the valley on either side accommodate the mask so that it can stay snug on the face. And most importantly, for me, I sweat a whole lot less. With normal pillows, I have to switch twice each night. With this pillow I sleep longer, deeper and with fewer awakenings - better than I have ever slept before."

- Kenneth D., Minnesota

"I really like the hose tether, keeps the plastic hose from making a racket against the bed frame when I shift."

- C.L., Virginia
